YOUR READING PATH

Your collection, in one place

Start where you are. If you are new, work through the foundation before buying software or pursuing collaborations. If you already post regularly, go straight to the improvement section and return to the basics whenever you need them.

Part	Use it when...
01 • Start small	You want the program overview, my story and a product inventory.
02 • Build your foundation	You need the complete Beginner path and your first action plan.
03 • Grow with a clear process	You want product-research, filming and improvement workflows.
04 • Expand your opportunities	You are ready for brand conversations and international planning.

This collection includes the full Beginner foundation and action plan, the expanded Advanced workflow, and the updated Expansion Toolkit. Shared extension lessons appear once; the expansion section adds bulk outreach, community links, YF Creators, Cha-Ching Automate and international signup steps.

The three paid guides total \$137 separately. The \$99 bundle saves \$38. The starter kit is free either way.

Independent education from Cash for Creator; not an Amazon publication or endorsement. Approval, placements and income are not guaranteed. Examples are illustrative unless identified as my experience. Rules and account screens change: your current Amazon dashboard and official terms take priority.
